The game is "sized" to use $3 / 4$ inch wood cubes.
When creating the Building Cubes with the following graphics, you will need to make the following amounts:
14 Double (Corner) Window Cubes
19 Single Window Cubes
18 Doorway Cubes
12 Ornamental Cubes
12 Chimney Cubes
10 Staircase Cubes
15 Cornerstone Cubes
Not all graphics will be used. If you don't want to go through the trouble on sticking on 6 Cornerstone stickers for each Cornerstone, you can simply mark each side with a marker or something. What is important is that it is easily recognizable as a Cornerstone so players do not try to remove it during the Rebuilding phase.

Also included, for those who are not faint of heart, are images of blank Brick faces, to replace the Blank sides of Cubes for a more fabulous looking Estate.
